

Suggested Racking Rule

Reserved for accessibility
Reserved U37-U41 for Rack-Rack Switches <i>if ordered</i>
- - Any component placed above 32U should be accessed by the Compliance team for Tipping (if use MFG factory rack integration) ... - - MTM required sliding rail should not be place above U38 (Service)
Reserved U24-U26 for In-rack Network Switches
Start at U2 and go UP Common Rule: --Place Pod / same MTM / Similar <u>Function</u> together --Place Heavier MTM first starting U2 --Follow native MTM unique racking requirement
Your own Racking Rules: -- Recommend (0 -18) 2U Servers per Rack -- CEPH node and Swift node are placed in the lower part of the rack -- <u>Openstack</u> controller and compute follow -- 2 racks per Set of network switch
